CAPABILITY & REPUTATION

Geo-Logix
environment • geotech

Geo-Logix delivers expert environmental solutions and geotechnical engineering services Australia-wide. We get the right information to understand the ground risks of your site so you can move forward with your project. We are specialists in contamination assessments and remediation and can advise you on the environmental risks associated with property transactions or development projects.

Geo-Logix's reputation for strategic advice and timely service continues to grow after more than a decade of helping clients achieve the best possible outcomes for their projects. We regularly work with some of Australia's largest property developers, architects and legal firms, and also manage diverse projects for petroleum retailers, industrial clients and government organisations.

Whether you need a site assessment, clean up strategies, compliance support or geotechnical advice, we can help you solve the ground issues of your site.

Geo-Logix provides an excellent service for Woolworths Property Group. In the complex field of environmental contamination and regulation Geo-Logix cuts through the issues providing sound, straightforward economical advice.

Woolworths Limited

Geo-Logix are technically competent professionals who are always willing to work with their clients to provide environmental solutions. Their common sense and logical approach to environmental problems is to be highly commended.

Randwick City Council

The scope provided by Geo-Logix was technically savvy, cost significantly less than what was being proposed by our original consultants, and satisfied the Audit and Planning conditions. Geo-Logix's integrity and commitment to the project was exemplary.

Property Development Services

Technical and Regulatory Experts

Our technical expertise spans geology, chemistry, engineering and toxicology. We are industry certified and know what it takes to meet stringent legislative requirements. Our accredited auditor will ensure our solutions balance commercial objectives with compliance issues.

Professional, Safe and Accredited

Geo-Logix has an outstanding track record for quality and safety. Our ISO 9001 quality management system ensures the integrity of our data collection, analysis and reporting. We will identify your site risks and give you cost-effective solutions.

Cost Effective

Our mission is to save you money through tech savvy analysis and commercially-sound solutions. We are guided by your commercial objectives and work hard to protect your financial liability.

Experience You Can Count On

We have performed hundreds of complex environmental and geotechnical investigations in diverse environments across Australia and the US. We regularly support the design and construction of all kinds of developments and have won accolades from some of Australia's largest companies.

Save Money Working with the Same Team

When you work with Geo-Logix you will have the same team whether it's a Phase I investigation or remediation project. You can also combine environmental and geotechnical assessments for greater cost savings.
